I- Read the following text then do the tasks below:

The first steam engine was built in 1698 by the mechanical engineer Thomas Savery. The development of this device led to the emergence of the Industrial Revolution in the coming years, which allowed the beginning of the production of engines of various functions. mass

The inventions of the Scottish engineer James Watt gave rise to the modern mechanical engineering, which opened the door wide for the development of specialized machinery and their maintenance tools during the Industrial Revolution and led to the rapid growth engineering in its native Britain and abroad.

Chemical engineering, like mechanical engineering, developed in the nineteenth century during the Industrial Revolution. The work of James Maxwell and Heinrich Hertz in the late nineteenth century gave birth to the field of electronics and electronic engineering.

Today, aeronautical engineering deals with aircraft design; this field of engineering has been growing day after day to allow humans make their dreams come true to invade the outer space by designing better spaceship. Finally, with the advent of computer technology in the 1990s, the first search engine was built by the computer engineer Alan Emtage.

The brilliant minds of engineers are still creating whatever it takes to elevate our world to make it a better place to live.

- Answer the following questions: (18 marks)

1. What paved the way for the Industrial Revolution?
2. When was chemical engineering developed?
3. Why has the field of aeronautical engineering been growing?

Find words in the text which mean the following: (12 marks)

4. actions performed to keep a machine or system functioning.
5. the science of designing, making, and flying planes.

- Rewrite these sentences about the text to correct the information: (12 marks)

6. The origin of mechanical engineering is France.
7. Engineers stopped inventing anything new.

II- Read the following text then do the tasks below:

Most people think that education is limited to schools only, but the truth is that there are lessons that we can only learn from life, and they may be more important than those learnt at schools. Life lessons are sometimes painful before they are acquired, and in order to avoid this, we must benefit from the experiences of others. We shouldn't pay too much attention to the trivial things that are not important and waste our time and effort. Since life is so unpredictable, we must not live on expectations only and meet everything new in life with optimism and positive thinking. There is no word more boring and monotonous than the word "I". We must be confident of ourselves, but that does not mean we talk about ourselves and our accomplishments all the time, as this leads to vanity. Human relationships are also important because without love and support from family and friends, you would not feel happy and would not achieve success in life. Man by nature makes mistakes, so be tolerant and seek excuses for those around you, and if someone comes to you with an apology, do not stop him, and do not carry in your heart any envy of anyone. There are no alternatives to exercising, eating well, fresh air, and sunshine. Take care of your health and make it a priority for your entire life.

- Choose the correct answer A, B, C or D : (24 marks)

8. Life lessons are ..... than those of school.
a. less complicated b. more important
c. less painful d. easier

9. Talking a lot about our accomplishments leads to .....
